

List of Accepted papers for MIWAI-2011

Paper #	Paper Title
2	Crisp and soft clustering of mobile calls
5	Typhon - A Mobile Agent Framework For Real World Emulation in Prolog
6	Handwritten Kannada Vowel Character Recognition using Crack codes and Fourier Descriptors
7	Machine Learning Based Performance Prediction for Multi-core Simulation
9	A Rule-based Approach to Form Mathematical Symbols in Printed Mathematical Expressions
10	Online assignments of containers to trains using constraint programming
11	PCA plus LDA on Wavelet co-occurrence histogram features: Application to CBIR
15	Printed Text Characterization for Identifying Print Technology using Expectation Maximization Algorithm
18	Reduction of Hiding Failure in Randomized Additive Perturbation Technique in PPDM
20	A Modified Harmony Search Threshold Accepting Hybrid Optimization Algorithm
21	A Max Metric to Evaluate a Cluster
23	A binary-real-coded differential evolution for unit commitment problem: a preliminary study
24	Structural Distance Between EL+ Concepts
27	Combining Collaborative Filtering and Sentiment Classification for Improved Movie Recommendations
29	Fuzzy-based Trusted Ant Routing (FTAR) Protocol in Mobile Ad hoc Networks
30	Fibred BDI Logics: Completeness Preservation in the presence of Interaction Axioms
31	A Resilient Voting Scheme for Improving Secondary Structure Prediction
33	A shape representation scheme for hand-drawn symbol recognition

34	New Replica Selection Broker for Binding Replica Sites in DataGrid environment
35	Optimal Service Composition via Agent-Based Task Allocation
40	Differential Evolution algorithm for motion estimation
42	Extensions to IQuickReduct
43	On modeling the affective effect on learning
44	Pattern synthesis using fuzzy partitions of the feature set for nearest neighbor classifier design
45	A Rule based Approach to Group Recommender Systems
46	Distributed Methodology of CanTree Construction
48	Forecasting Using Rules Extracted from Privacy Preserving Neural Network
49	Gibbs Sampling with Deterministic Dependencies
51	Swarm Intelligence based Localization in Wireless Sensor Network
53	Variable Neighborhood Search for a Real-World Curriculum-based University Timetabling Problem
55	Automatic Composition and Mediation on Multiple-Language Semantic Web Services
58	Association Rule Centric Clustering of Web Search Results
62	Data Clustering Using Modified Fuzzy-PSO (MFPSO)
64	Investigative Behavior Profiling With One Class SVM For Computer Forensics
66	Local and global intrinsic dimensionality estimation for better chemical space representation
67	Reasoning about DNSSEC
68	Enhancing Cooperation in Distributed Information Systems using Conviviality and Multi-Context Systems: A Preliminary Report
69	An OWL Ontology for P3P : Formalizing and Reasoning with P3P Policies Using a Semantic Web Ontology
71	Compromise Matching in P2P e-Marketplaces: Concepts and Illustration
